

## SPECIAL ISSUE CALL FOR PAPERS

### **Managing Gender Equity and Equality across Borders: Research, Practice, and Evidence-based Recommendations**

Guest Editors:

Katharina Bader (Northumbria University, UK)  
Lena Knappert (VU Amsterdam, The Netherlands)  
Mila Lazarova (Simon Fraser University, Canada)  
Eddy Ng (Bucknell University, USA)

Gender equity and equality (i.e., giving the same opportunities to men and women and supporting them according to their specific needs) are among the grand global challenges as women comprise 50% of the world's population and its human capital (United Nations, 2019). From an economic perspective, if managed effectively, increased gender equity and equality can enhance team and organizational performance (Hoogendoorn, Oosterbeek, & Van Praag, 2013; Roh & Kim, 2016). From a moral imperative, gender equity and equality contribute to women's opportunity to succeed in business and society (Seierstad, 2016). Yet, although gender is among the most frequently addressed diversity dimensions, the progress towards gender equity and equality in business and society has been described as "stubborn" (Gavett & Perry, 2019) and "stalled" (Sandberg & Thomas, 2018).

To foster change, many organizations implement gender diversity management (GDM), defined as human resource practices aimed at improving gender equity and equality at work (Martins & Parsons, 2007). GDM covers a comprehensive spectrum of initiatives including targeted gender recruitment, gender blind selection, anti-discrimination/equal employment opportunity programs, mentoring, professional development, and work-family friendly policies among others (Ali, Metz, & Kulik, 2015; Beck, 2005; Kalev, Dobbin, & Kelly, 2006; Olsen, Parsons, Martins, & Ivanaj, 2016). To be effective, research indicates that GDM needs to be context-sensitive as each country exhibits a unique socio-political context regarding the role of women in organizations and society that affects the acceptance, implementation, and outcomes of GDM (Hennekam, Tahssain-Gay, & Syed, 2017; Klarsfeld, 2010; Özbilgin, Syed, Ali, & Torunoglu, 2012). The need for such contextual understanding is particularly salient in multinational corporations (MNCs) as their operations span across different contexts and they may face severe barriers and resistance when implementing global approaches to GDM (Alhejji, Ng, Garavan, & Carbery, 2018; Festing, Knappert, & Kornau, 2015; Kemper, Bader, & Froese, 2018).

Research on GDM in MNCs is, however, sparse (Cooke, Wood, Wang, & Veen, 2019) and research on GDM in single country and comparative studies has provided only few insights on the influence of context, as most studies have been conducted in the West (e.g., Ng & Sears, 2017; Olsen et al., 2016), with a strong focus on Europe and the US where GDM first originated (e.g., Kalev et al., 2006; Martins & Parsons, 2007; Virick & Greer, 2012). From there, GDM has spread across different countries, but often without challenging the cultural assumptions underlying it. For example, studies indicate that Asian organizations mostly follow what seems to be global best practice with only very little adaptation to local context (Donnelly, 2015; Ng & Chiu, 2001). Similarly, comparative research indicates that there is a shared understanding of GDM practices, only their focus across countries is slightly different (Kemper, Bader, & Froese, 2017; Olsen et al., 2016). While such findings are informative, we need more systematic work to deepen our understanding of the role of contextual differences

and develop theory-informed and evidence-based recommendations on how the effectiveness of GDM across different country contexts can be improved.

Given the emerging state of the field, this special issue invites papers that generate theoretical insights, empirical findings, and evidence-based recommendations on how organizations can effectively tackle the challenges arising from managing gender equity and equality in and across different country contexts. Single country studies will not be a priority for this special issue. Although women are still the primary target of GDM and thus the main focus of our special issue, GDM has been expanded to include different gender expressions and gender identities emanating from a greater recognition of non-binary or trans-gender identities and their intersections (American Psychological Association, 2015). Taking account of these developments and welcoming this broadening of scope, we also invite manuscripts within this expanded understanding of GDM, including studies that focus on the allied concepts of gender diversity and inclusion in context.

The following are illustrative themes and research questions that we aim to address in this special issue. Authors are encouraged to submit papers with wider perspectives (and different methodologies) as long as the papers meet the aim of this special issue.

### 1) Studies on GDM in MNCs

- To what extent do MNCs address GDM in their subsidiaries and how do they handle the tension between global standards and local adaptation?
- What are the challenges of implementing GDM in (multiple) foreign subsidiaries? How do these challenges differ according to home and host context?
- How does GDM gain legitimacy in foreign subsidiaries and their environment?
- How do foreign subsidiaries develop power resources to influence policy making at the HQ?
- How does context influence HR managers in their decision making with regards to GDM? How do local actors engage with foreign GDM practices in organizations?
- How are different gender identities and expressions addressed in MNCs' GDM?
- Are expatriates a GDM target group and do they receive particular support during periods of international mobility? How are different gender identities accounted for?

### 2) Comparative studies on GDM

- How does the context affect acceptance, implementation, and outcomes of GDM?
- To what extent does the "genderedness" of organizational practices differ across countries and how does that affect the enactment of GDM?
- How does the country context shape the definition of "gender" in GDM practices (e.g., does it include issues of intersectionality and different gender identities), and how is that reflected in GDM policies and practices?
- How does societal backlash affect GDM in organizations? How does country context shape the extent and nature of backlash?

### 3) Studies enhancing theory of GDM across borders

- Which alternative theoretical frameworks help explain the context-specific nature of GDM and its outcomes?
- How can international business and HRM theories and studies inform research on GDM in international settings?
- Can a theory of global GDM be developed?
- How does the concept of intersectionality inform theories of GDM in the international context?
- How can international business theories extend recommendations for GDM practice?
- How do different research methods help to bridge GDM in organizations and international business studies?

Full papers should be submitted between 1 – 30 May 2021 at <https://mc.manuscriptcentral.com/hrmj>, indicating “Managing Gender Equity and Equality across Borders” as the Special Issue. HRMJ will not be able to consider late submissions. The Special Issue will likely be published in 2022.

Enquiries related to the call for papers should be directed to Katharina Bader ([katharina.bader@northumbria.ac.uk](mailto:katharina.bader@northumbria.ac.uk)), Lena Knappert ([l.j.knappert@vu.nl](mailto:l.j.knappert@vu.nl)), Mila Lazarova ([mila\\_lazarova@sfu.ca](mailto:mila_lazarova@sfu.ca)), and Eddy Ng ([eddy.ng@bucknell.edu](mailto:eddy.ng@bucknell.edu)).

Enquiries related to the online submission process should be directed to: [HRMJ.journal@wiley.com](mailto:HRMJ.journal@wiley.com).
